

Technical Data Sheet "Netztester WMR"

Brief description

The handheld measuring device "*Netztester WMR*" is used to determine the available Wireless M-Bus networks and their performance. Therefore, the signal strength and complete Wireless M-Bus telegrams can be received and displayed. The comprehensive, convenient Android/iOS app helps to avoid installation aborts. An export of the data as csv/JSON & XML-file is also possible.

Technical data:

Antenna connections	1x SMA for external antennas
Internal rechargeable battery	Internal Li-Ion battery
Charging port	Micro-USB
Power supply unit	USB power plug and Micro-USB charging cable
Testable networks	Wireless M-Bus (OMS) Signals Wireless M-Bus Telegrams Supported modes: S, T,C and R2
Display indication	Package view (meter number & attenuation), detail view (signal attenuation, battery status, meter number)
Providing of measurement results	Display of meter number & signal attenuation; display of extended data via app and as csv/JSON/XML-file via measurement data export.
Functions of the device	Data transfer to the app is done via Bluetooth Low Energy (BLE) <ul style="list-style-type: none"> Measurements of Wireless M-Bus networks

Legal information

Register entry: Local court Hamburg,
HRB 151086
VAT ID: DE305978714
Managing Director: Christopher E. Niemöller

Scope of delivery

- Raw data view of the Wireless M-Bus telegrams
- Simulation of transmitter/receiver (2 Netztester WMR required)
- Use of own antennas
- Data export as csv/JSON/XML-file

Netztester WMR, charging cable, charging plug, FAKRA adapter, carrying case, quick start guide
